Research Assistant

University of Waterloo, Waterloo, ON   Jan 2020 - Apr 2024

– Built a new framework for the plant-capture method to estimate population size by incorporating uncertainty in the plants' assessments and also other factors with Bayesian and frequentist inference approaches.

– Analyzed the stock population, proposed new Bayesian genetic mark-recapture methods, and applied to simulation studies and real-data analysis.

– Supervisor: Audrey Béliveau, Ph.D., Martin Lysy, Ph.D.

Consultant
UW Statistical Consulting & Collaborative Research Unit, Waterloo, ON
Sep 2023 - Apr 2024

– Advising students and faculty members on how to leverage sound statistical approaches in their analyses, with more active involvement in enhanced service projects.
